

Fleetwood Software Specification Sheet

Software Name: Edivote™ for Reply® Worldwide, Mini, Plus, Mini+

Software Features:

- Automatic detection of base station and channel, alleviating any need for the user to have to configure a base station.
- All templates use Microsoft* Chart and can be adapted in any way that is capable of being supported by Microsoft* Chart.
- There is no complex database or installation issues as data is computed from the PC's memory cache.
- Edivote™ offers the ability to directly convert a question written in a standard PowerPoint™ slide to an Edivote™ polling slide.
- Whether authoring a questions, conducting a poll or generating a report, Edivote™ has been designed to accomplish each operation in just 3 simple steps (“As easy as 1,2,3”).

Distinguishing Elements:

Edivote™ operates with the Worldwide, Mini, Plus and Mini+ platforms. It is restricted to a single base station (250 capacity when using Worldwide and Mini and 500 capacity when using Plus and Mini+). It offers simple basic single-digit voting with three templates (Vertical Bars, Horizontal Bars and Pie Charts). Edivote™ is an add-in to Microsoft PowerPoint* and can be operated on Windows XP, Vista, Office 2003 and 2007. Edivote™ also offers the ability to generate basic reports in Microsoft Excel*.

Warranty: Software is warranted to be free from defects in materials and workmanship under normal use for a period of 24 months from the date of delivery.

Operating System Compatibility: *Windows XP, Windows Vista, Office 2003 and Office 2007
